Dear Supreme Court;

The Michigan Constitution as well as the United States Constitution makes it clear that judges are not to make the law but rather interpret the law. Why is the Michigan Supreme Court even considering taking steps that would effectively change the law by denying Michigan asbestos disease victims their right to a jury trial.

It seems that Michigan and the Michigan Supreme Court are being used as tools of the asbestos industry and big business to deny working people their constitution rights to jury trials when harmed by corporate misconduct.

I personally have been affected by asbestos in my lungs. My lungs breathing capacity is only about 56%. It has kept me from doing things that I always love to do, such as, hiking on trails in the hills or mountains, deer hunting, helping a friend building a home and other activities that cause me to breath hard.

I have not been able to work in building trade for the last six to ten years, because I get short winded and have to stop and take a break or rest. No employer wants a worker like that.

Some one needs to pay for their misconduct.

Yours truly
